UPMAS HOMECOMING 2015

This serves as invitation
Target participants:

General practitioners, family and community medicine physicians, general IM/Pedia/ Surgeons/Ob-Gynecologists, DOH physicians and Doctors to the Barrios, and other health workers

GENERAL DESCRIPTION

This course will bring to fore “game changers” in medicine and surgery which has changed how we care for patients. It will feature topics to improve clinical outcome and prevent disease progression in diseases that afflict patients in different settings.

LEARNING OBJECTIVES

At the end of the course, the participant will be able to
1. Know the recommended vaccination schedules in both children and adults and vaccines currently in development.
2. Review and appreciate ERAS protocols and how they have improved surgical outcome
3. Appreciate the importance of nutrition in improving patient outcome
4. Understand the role of the physician in preventing antibiotic resistance
5. Improve their management of patients with cardiac disease, liver disease and diabetes and menopause.
6. Appreciate the role of digital technology in improving healthcare delivery.
7. Understand what pharmacogenetics and pharmagenomics is
