**CSIRO**

Digital Health Interoperability
BOOTCAMP MNL

Dear **Manu Gaspar**

Our final day at the **Digital Health Interoperability Bootcamp** highlighted our community's new learnings, with attendees showcasing what they have been able to accomplish over three days - **thank you so much for joining us!** Here are just a few highlights from our last day at the Bootcamp.

Data-driven decision-making on FHIR

The Digital Health Interoperability Bootcamp concluded with a focus on *Data-Driven Decision-Making on FHIR* for its final day.

The day included sessions on **access control** and **data analytics on FHIR**, featuring **Google FHIR Data Pipes** and **SQLonFHIR v2**, as facilitated by Bashir Sadjad and Vasilii Kupriakov. The morning session ended with a discussion of **hybrid approaches to data-driven decision-making** with Fred Hersch.

Show-and-tell presentations

Participants then engaged in facilitated exercises in **parallel learning tracks** and **participant presentations** - showcasing the learnings of attendees - aka your new colleagues and friends!

The bootcamp ended with a **synthesis of key takeaways** and next steps by Alvin Marcelo, and a final wrap-up.

Feedback

We appreciate your feedback about your participation at the Bootcamp.

We invite everyone to **please accomplish the feedback survey** below.

The feedback survey will help us improve future events, as well as to allow us to send your **Certificate of Appearance** and **Certificate of Appreciation**.

The survey is anonymised, but if you want to raise any concerns or issues with a preference for being identified, please email silab.upm@up.edu.ph

silab.upm@up.edu.ph.

Accomplish the feedback survey here

Thank you for joining the Bootcamp!

The Bootcamp is co-organised by the University of the Philippines Manila Standards and Interoperability Laboratory (UPM SILab) in collaboration with Commonwealth Scientific and Industrial Research Organisation (CSIRO) Australia.

This event is part of the Strengthening Standards Capability Project (SSCP) for improved adoption of Digital Health Data Standards and Interoperability for the Southeast Asia and Pacific region.

The Bootcamp is supported by technology partners Google Open Health Stack, Smile Digital Health, Health Samurai (AidBox), Telstra Health, and Beda EMR.
